

Figures + Captions

Team 3

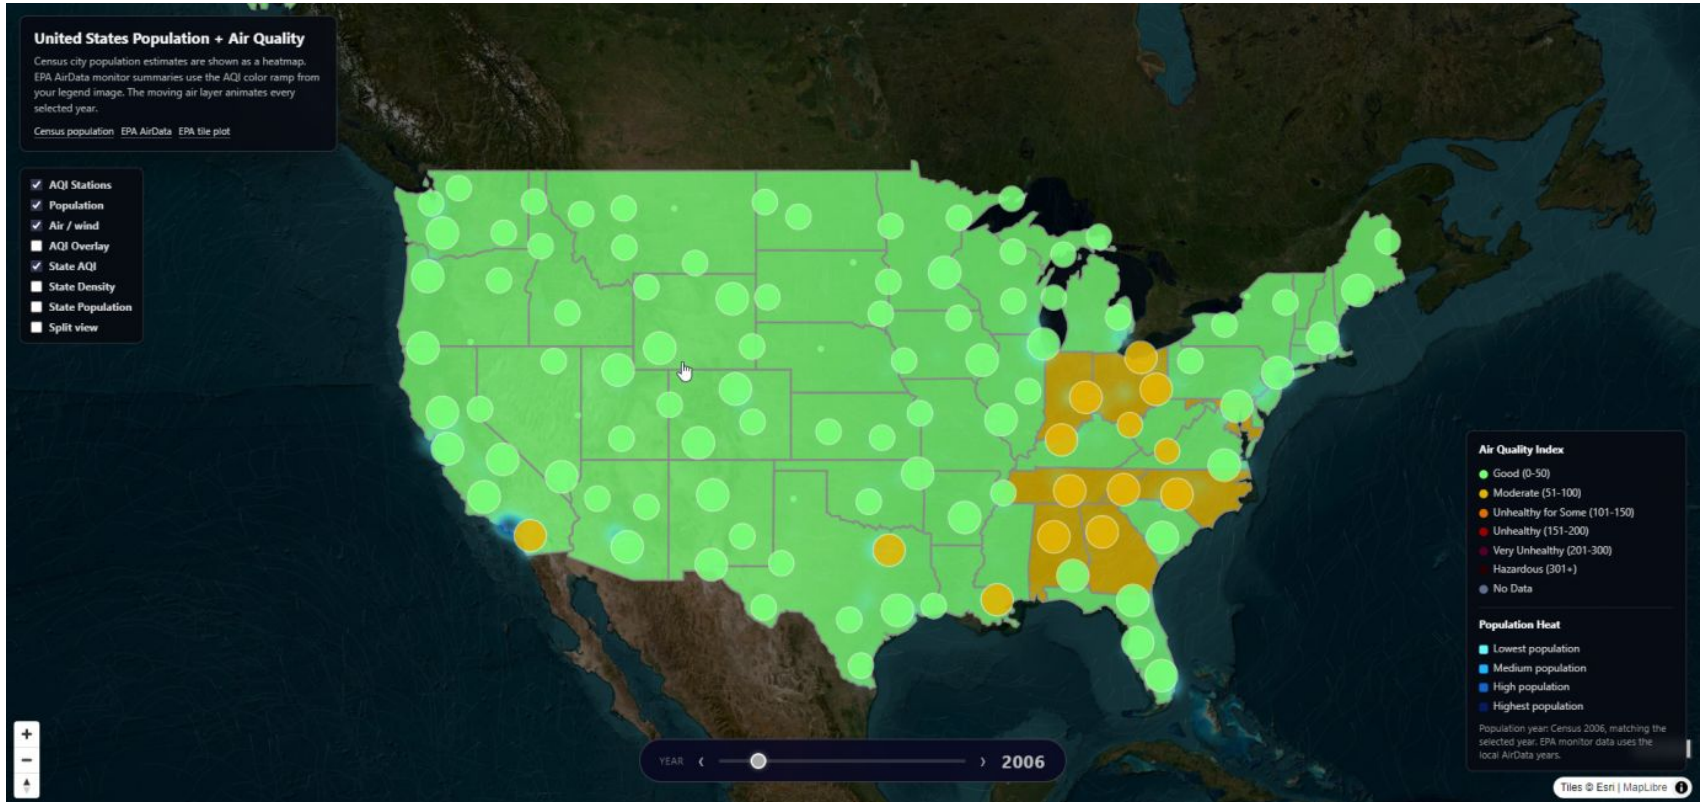

Website

Interactive site has several customizable figures that would be too much to list all in this folder. Examples are shown below, along with figures used through the creative process.

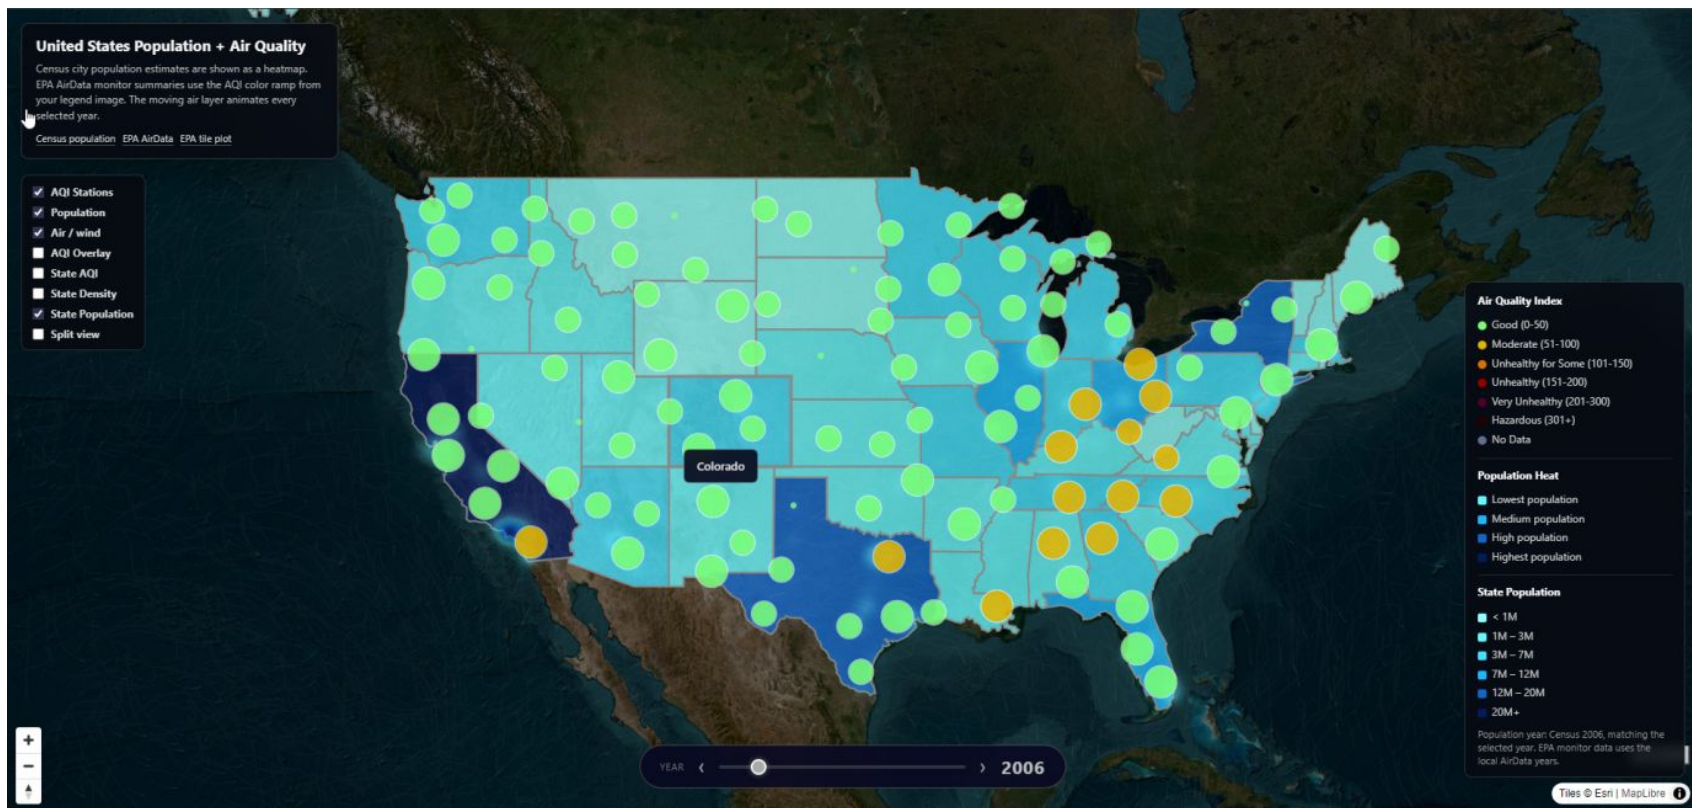

Images above shows how geographic resolution of information will change via zoom level.

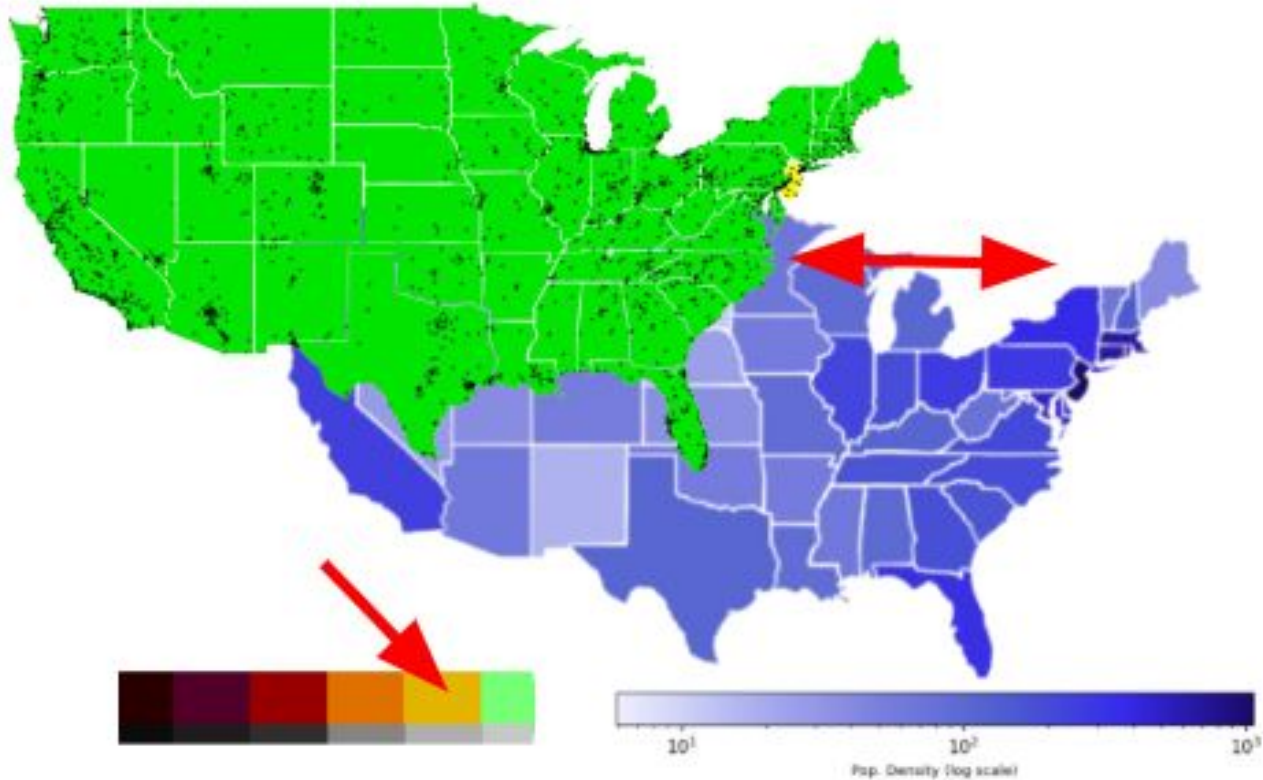

AQI by State

Population Density by State

Concept for twinned view feature to evaluate AQI and population density.

Maps below show difference in air quality from 2000 to 2025. Current color bins highlights the pop-out on each map
